Course Goals & Objectives

This course is designed to update pathologists in the latest advances. The program will consist of lectures, predominantly based on case presentation followed by discussion to provide pathologists insight in difficult diagnoses. In addition to morphologic presentation, recent advances in classification and the use of molecular testing will be discussed.

Target Audience

Pathologists and pathologists in training

General Information

The tutorial will be presented in person at UAMS. Audience either can attend in person or through Internet-live Zoom Program (In person for up to 100 participants upon approval of UAMS)

Course Material

All course material containing the presenter's slide presentation, PDF format, and references will be available for download 48 hours prior to the tutorial online to all registered participants. The course will use a virtual platform for all presentations. After registration, the link will be forwarded to all registrants. Advance registration is strongly suggested for appropriate planning and to ensure access to the site and the handout material in a timely manner.

Financial Disclosure

None of the presenters have any financial disclosures. All materials presented reference the recent published literature. Presenters strictly adhere to the policies of the office of ACGME at UAMS.
